PREFACE

The greater success of computer lies when it meets the need of the people who used it, when it works without error over along time.

Thus computer is inescapable in today's world. Developing a project is practical relying on a set of concept i.e. Development of project involves dedication and hard-work of the programmers and guides who are experienced ones and who better knows true techniques to be applied in the project.

TABLES OF CONTENTS

Contents	Page no
ACKNOWLEDGMENT	**1**
ORGANISATION PROFILE	**2**
EXISTING SYSTEM	**3**
LIMITATION OF EXISTING SYSTEM	**4**
SCOPE OF SYSTEM	**5**
ADVANTAGES OF SYSTEM	**6**
Chapter1: INTRODUCTION	**7-9**
1.1 Existing system	3
1.2 Objectives	7
1.3 Problem definition	8
Chapter2: THEORETICAL BACKGROUND	**10-12**
2.1Methodologies	10
2.2Data models	11
2.3 ER modeling	11

Chapter3: SYSTEM DESIGN **13-191**

3.1Methodology adapted 13

3.2Software process model 14

3.3System analysis and design vis-à-vis require 22

3.4Detailed PERT chart 23

3.5Event table 26

3.6ERD 30

3.7Context Diagram 25

3.8DFD 31

3.9Coding 39

3.10Table Structure 186

Chapter4: SYSTEM IMPLEMENTATION **192-198**

4.1 Visual Basic 6.0 as front-end tool 192

4.2 Microsoft SQL server 2000 as back-end-tool 192

4.3 Cost and Benefits Analysis 196

Chapter5: SYSTEM TESTING **193-204**

5.1Methodology used for testing 200

5.2Software testing approach 203

5.3 System maintenance and evaluation 205

Chapter6: CONCLUSION **206-207**

6.1Conclusion 206

6.2Limitation of the system 206

6.3Future scope 207
